

HEALTHY HABITS (AGES 5-13)

Healthy Eating

Enjoy Family Meals Together

- Eat meals together as a family when possible; this helps children feel safe and connected.
- Keep mealtime relaxed and free from screens or toys, so everyone can talk and enjoy.

Have a Variety of Foods

- Offer many types of foods: vegetables, fruits, whole grains, and protein.
- Make water your main drink.

Follow Meal Roles

- Parents decide: what food, where, and when to eat.
- Children decide: how much to eat. They will eat different amounts each day, and that's normal.
- Following these roles can help children learn to trust their bodies and have a positive relationship with food.

Physical Activity

- Children should aim for 60 minutes of physical activity every day.
- Move enough to sweat or get out of breath; bike, swim, run, or play at the park.
- Keep moving during the day. Take breaks and move between sittings.
- Be a role model, be active! Children copy their parents.
- Try new activities together, so movement stays fun and interesting.

[Children & Youth Movement Guidelines](#)

Sleep

- Most children need 9–11 hours of sleep per night. Every child is different. Some children sleep more; others sleep less.
- Follow a bedtime routine. Go to bed and wake up at the same time each day.
- Create a calm sleep space: have a cool, dark and quiet bedroom.
- Turn off screens 1-2 hours before bedtime. Avoid caffeine 4-6 hours before bed (including pop and chocolate).

Screen Time Management

- Limit screen time to 2 hours outside of schoolwork.
- Avoid using screens as a distraction. It may help for a little while, but children need to learn how to calm themselves without screens. Try the parenting strategies linked below to help your child develop self-soothing skills, without screens.
- Be a role model, reduce your own screen use when you are with your child.
- Prioritize family time, focus on activities that keep everyone active and connected.

Other Healthy Habit Tips

- Talk with children about feelings and school experiences.
- Wash hands often to stop the spread of germs.
- Brush teeth with fluoride toothpaste to prevent cavities. Visit a dentist once a year. www.Bcdental.org
- Keep children safe in the car by using a car seat or booster until they are 145cm (4'9") or 9 years old. [ICBC](#) | [BCAA](#) | [Transport Canada](#)
- When walking, look left, right, and listen. Wear reflective clothes and use lights after dark.
